

You are warmly invited to an

Information Day for Resource Managers about

DIFFERENT MITIGATION OPTIONS FOR VARIOUS SITES WITHIN THE PIAKO CATCHMENT

Tuesday, 12 November 2019

At the Tatuani hall, Tatuani.

Please RSVP for catering purposes before Monday 4th November 2019 to:

Nardene Berry
Waikato Regional Coordinator, NZ Landcare Trust
email nardene.berry@landcare.org.nz
or phone 07 859 3725

Numbers are limited but if there is someone else you think would like to attend this day, please let them know. Since we are visiting farms please ensure you arrive with clean footwear and vehicles to avoid biosecurity risks.

Supported by

DRAFT PROGRAMME:

9.30am – Arrival/Morning tea

10.00am – Welcome and Introductions
Nardene Berry – NZ Landcare Trust

10.15am – Speakers

Roland Stenger – Lincoln Agritech Ltd
Elucidating critical pathways for nitrate transfers in the Piako headwater catchment, supported by helicopter-borne electromagnetic surveys

**Justin Wyatt – Waikato Regional Council
Soil Scientist**

Insights into subsidence and contaminant losses for drained Waikato Peat Soils

**Rebecca Eivers - Freshwater Ecologist
& Wetland Specialist, Streamlined
Environmental**

Edge of field mitigation options to improve water quality and biodiversity

Aldrin Rivas – Lincoln Agritech Ltd

Trialling a denitrifying bioreactor to treat discharges from subsurface drains on a Tatuani dairy farm

11.30am – Lunch

(Packed lunch provided – please confirm any dietary requirements when you RSVP)

12.15pm – Site visits

We will be visiting farms in the area if weather conditions allow to view a woodchip bioreactor, a constructed wetland treatment train, and an Advanced Riparian Management Zone (ARMZ).

We will car pool as much as possible.
